The trees in question are about 100 yards east of my house and nowhere near my property line. They are encroaching on my 'virtual' property line however. I'm going down to mark them now. I'll send a picture or two.

Thanks
Steve

It probably would be easiest to mark your property line, since the ACC request is about growth that is encroaching on, or overhanging, your property. That will keep you from having to step into any water without waders...

Will do. How should I mark them? Spray paint? Ribbon? Also, some are in very deep water and I don't have waders ;-). It would be best if I went along to explain what I have in mind.

Steve,

It would be very helpful if you WOULD mark the trees you are asking for help with in your acc request. One of us will try and get down there at some point soon to look at them.

Please review the attached. I will create a map or mark the subject trees upon request. Let me know what else you need. I will obviously pay for the job.

Thanks

Thanks,
Steve Bang
